Luxhide version available as model OTG11616B.
 See page 20 for more information.

Offices To Go model OTG11668B provides a high degree of comfort and adjustability. The seat is manufactured with resilient high density foam padding that allows the user to remain comfortable throughout the work day. The mesh back allows air to freely move through it enhancing the comfort. There is an adjustable lumbar support that moves in and out as well as up and down. The chair adjusts for different size users through the pneumatic seat height adjustment and the seat slider which allows the seat to be moved forward or rearward to achieve the perfect amount of support for shorter or taller people.

The chair arms are fully adjustable. A button on the side of each arm allows the arms to move up and down. The arm caps rotate inward and can slide forward as well, helping to provide great support when keyboarding. The arms are even width adjustable, meaning that with the OTG11668B a user can position the arms and armrests exactly where they will provide the greatest comfort and support. All of these features allow the chair to be truly customized to the size and preferences of the user.

All OTG models, including this one, are tested in advance of coming to market, and also tested during and after production to make sure that they meet applicable industry standards, such as ANSI-BIFMA. We want to make sure the purchaser is happy with OTG seating now and in the future. As a result, OTG chairs are great investments both now and over their lifetime.

A

The Built-in Lumbar support can be adjusted up and down. Its sliding action allows the user to position the lumbar support at the most comfortable and supportive position. Simply grip the adjustment tabs and move the support to the optimal location.

B

The Built-in Lumbar support is also adjustable in and out. This feature allows the user to "dial in" the exact amount of support desired. The amount of support is easy to adjust and change. Simply grip the control arms and slide them to your desired position.

Width Adjustable Arms can be slid in or out by 1.5" allowing the armrests to be positioned exactly where the user wants them. Simply move the lever forward to release movement of the sliding arm.

Height Adjustable Arms allow the user to position the arm caps exactly where they need to be. The arm height is easily changed through the use of a button under the outside edge of the arm cap.

Depth Adjustable Arms slide forward and rearward allowing the arm caps to be optimally located. They are constructed from a soft polyurethane material which provides comfort AND durability.

Pivot Adjustable Arms swivel to the left and right to face toward a keyboard or mouse. Rotating the arm caps so they aim where needed may help to reduce Repetitive Strain Injuries (RSI's).

OTG11669

CARE & CLEANING

Fabrics: To extend the life of your seating upholstered in fabric, regularly dust the chair to prevent airborne particles from penetrating the fabric surface. For light soiling, use a damp cloth and blot the spot with very slight pressure, taking care never to soak the fabric. Dry with a clean cloth by blotting - never rub fabric. More intense stains can be treated the same way, but with a mild detergent.

Luxhide®: For regular cleaning, simply use a soft, damp cloth, taking care not to soak the Luxhide. For more thorough treatment, soak a soft cloth in mild soap solution and wipe surface in a light circular motion. Repeat with clean water. Allow to dry and polish with a soft dry cloth. Do not use detergents, aerosol sprays or other polishes.

Always test fabric first in an unseen area before using any cleaning method.

Seating textiles shown are for reference only. While color consistency and quality are controlled to the highest standards, color may vary from samples shown.

For actual finish samples, please contact your local sales representative.
