SORRENTO

First impressions are critical. Visiting clients and potential customers will appreciate your sense of style as they approach your Sorrento reception station.

Sorrento offers a transitional design so it's equally at home in both contemporary and more traditional settings.

Equipping your Sorrento reception station with technology doesn't have to be a chore. Route cords to the floor through cable chimneys in the pedestals and easily reach connections in your wall using the removable access panels in the optional returns.
