## Convert your desking into semi-private modular systems

Conquer the task at hand with DIVIDE™, a modular desk-mounted panel system that can be added to most Global desk series. The panels can be vertically stacked and are available as laminate panels, fabric tackboards and glazed panels.

DIVIDE™ is easy to specify with so many size and panel finish options. Depending on office needs, individual work areas can be created to be semi-private using glazed panels or visually private using laminate and fabric panels.

For maximum work surface area, DIVIDE™ offers a built-in accessory rail for the most accessible desk top items. Everything from pens, paper clips, binders and file folders can be neatly organized ABOVE the worksurface, leaving a clean desk top for current tasks and paperwork.

Best of all, DIVIDE™ is easy to specify, install and add-on at any time.

DIVIDE's fabric and glazed panels have built-in rails to accommodate off-desk accessories that help to organize workstation paperwork. Binder holders and multi-compartment trays that house post-it-notes, pens, thumbtacks and paper clips create additional work surface area for daily tasks.

The standard accessory rail on most DIVIDE panels can take items off your worksurface, while placing them within easy reach. Storage of pencil/pens and CD's keep the work area clean, tidy and always well organized.

- Panels are available in 12", 18", 24" and 36" heights and can be stacked to produce heights of 12", 18", 24", 30", 36", and 42" to create a limitless variety of configurations.
- Available as fabric, glazed or laminate partitioning panels in a large array of finishes and colors to complement any office environment.
- Vertical stacking of panels provides semi-privacy or full visual privacy to personal workstations.
- Laminate panels offer an optional wire access cut-out at the bottom of each panel.
- Laminate transaction tops are offered in various shapes and sizes. Available either 1" thick to coordinate with Adaptabilities, Genoa and Halton components or 1 1/2" thick to match Correlation components.
