

MOTION RECLINER

CurraForm

healthcare

 cubicles.com

Recline effortlessly, transfer safely

CuraForm™ Motion Recliners are easy to operate and suited to a wide range of healthcare applications from acute to ambulatory care and long-term care. The series includes models with manual locking casters or four wheel central locking casters accessible from both sides of the chair. Select stationary and mobile models are available with folding arms to safely support patient transfer.

Relax and recline

3 position recliner with optional reverse recline

First position

Second position

Third position

Reverse recline position (optional)

CuraForm™ Motion Recliners follow the patient's intuitive response to reach for the arms when they want to come to a seated position. Additional ergonomic considerations include grip assist arms, waterfall front edge seat and built-in lumbar support. CuraForm Motion Recliners are tested and rated to an active weight of 400 lbs. Backed by Cubicles.com's Limited Lifetime Warranty.

Additional information can be found on the Cubicles.com [website](https://www.cubicles.com).

Ease and accessibility

Tablet movements

Parallel to chair arm

45° to chair arm

90° to chair arm

An optional Black phenolic folding tablet with a spill collector groove can be specified on the right, left or both sides of a fixed arm. When locked in the upright position, the tablet rotates 360° with a controlled resistance, without obstructing the patient when sitting or exiting the chair.

Fold-down arm

Open fold-down arm

Closed fold-down arm

Caregiver activated fold-down arm release

Fold-down arms provide ease of access to assist with patient transfer. The auto-retracting fabric panel enhances patient protection and provides an easily cleanable surface. The arm automatically locks when placed in the upright position.

Fixed or folding arms define each model

Motion recliner with urethane armcaps on wood legs

Motion recliner with left fold-down arm, wood armcaps, right tablet, reverse recline and foot tray, on manual locking casters

Motion recliner with right fold-down arm, solid surface armcaps, left tablet, reverse recline and foot tray, on central locking casters

Motion recliner with right and left fold-down arms, solid surface armcaps, reverse recline and foot tray, on central locking casters

Models are available with fixed wood legs, fixed locking front and swivel rear casters or four swivel, locking casters. Select models feature fold-down arms (right, left or both) and an optional extendable foot tray to support the user's feet when seated.

A closer look

The CuraForm Motion Recliner can be specified to best suit the needs of the patient, caregiver, and the intended application. Sealed seams are available on approved coated textiles for the back, arms and seat. Two textile specifications are available, as shown above.
