The Sonoma Collection was developed in response to the needs of care givers and changing expectations of people in care.

Sonoma Dressers are available in both three and four drawer configurations and at two depths to accommodate the room dimensions and geometry. Drawers move easily and close securely on high quality suspensions that extend up to 80 percent for easy access. Handles provide gentle contours and generous hand clearance to accommodate people with reduced vision or limited motility. Hutch bookcases are available in two heights as well as stand alone bookcases with one or more adjustable shelves for flexibility and structural integrity.

Specifiers will find the Sonoma Hospital bedside table and Bookcases are modular and align dimensionally with Sonoma Wardrobes to minimize the footprint and maximize the available space in the room. All Sonoma healthcare furniture are elevated off the floor to simplify housekeeping and improve infection control. A range of finish options and fascia profiles compliment the transitional styling and render a friendly and nurturing environment. Custom options are also available on a project basis to support the specific needs or culture of a facility.

Sonoma Healthcare Furniture Features and Benefits

Wire Management

A large wire management grommet provides easy access for TV, DVD or VCR cables to connect to wall power and communication outlets.

Shelves

Bookcases are fitted with a combination of fixed and adjustable shelves to provide flexibility and superior structural integrity.

Tops

The top of each dresser is constructed of high pressure laminate with a color matched 3mm polymer edge providing a durable, stain resistant and easy to clean surface.

Locks

A lock is available for the top drawer of all dressers. A key alike option is available, in addition to a master key for facility administration.

Handles

Five handle options are available in coordinating finishes. All handles deliver minimal interference, gentle contours and generous hand clearance to accommodate people with reduced vision or limited motility. Custom handle options are also available on a project basis, consult your GlobalCare Representative.

Drawers

Dresser drawer interiors are polymer wrapped for stain and moisture resistance. Drawer suspensions offer an 80 percent extension and allow for the drawers to be removed for cleaning or transfer by housekeeping staff.

shown in Avant Honey.

Top Fascia

The top fascia is available in four attractive transitional styles and acts as a guard to prevent small objects from rolling off the back of the wardrobe and out of reach. A fascia at the bottom of the wardrobe is provided in a matching profile.

Legs and Frame

The dresser legs and bookcase frames are constructed of heavy duty aluminum extrusions and provide superior structural integrity due to the continuous attachment along the full length of the cabinet's frame. The legs are finished in color coordinated and environmentally friendly powder coated epoxy. Custom colors are available on a project basis, consult you GlobalCare Representative for more information.

Ventilation

Ventilation openings are provided at the top of both side gables to promote airflow. All of the ventilation openings are fitted with a polymer liner for durability and cleaning. The ventilation openings also provide the attachment for the hanging accessories.

Hanging Accessories(Optional)

The Hanging Accessories can be located on either side of the dresser and provide additional storage and quick access to magazines, facial tissue, hanging bags and other personal items. The Hanging Accessories are finished in a durable, powder coated epoxy finish that matches the legs and can be easily removed for cleaning.

Chassis

The chassis panels are fully captured along the entire length of the aluminum leg framework providing superior strength and structural integrity.

Glides

Glides on all four legs are height adjustable to ensure that the top surface can be levelled or slightly angled back towards the rear fascia to reduce the potential of small objects rolling off the top and out of reach.
