

GC7530-25
Wellness split back medical chairs.

GC7530-23
Wellness low back medical chairs.

GC7511-21
Wellness high back rocking medical chairs.

The functional design and therapeutic features of the Wellness series of medical chairs make them an ideal hospital chairs seating solution for senior care and healthcare facilities. The Wellness series of medical chairs offers a range of products to fit applications from resident/patient rooms, lounges and lobbies, guest and hospital waiting room furniture to dining room applications. This Greenguard certified product line offers a unique moulded foam back cushion with both concave and convex shaping, giving maximum

comfort. Hardwood frames are joined using mortise and tenon joints with additional bracing to ensure increased strength and durability. A fully encased upholstered moulded foam seat cushion protects the interior of the seat from spills, body fluids and other unwanted exposure that impact negatively on housekeeping efforts.

Above (and Cover): all products shown in Mayer, New Dimensions Pompelli (WC764-001), frame finish in Shaker Cherry (SKM).

Optional 4-position adjustable back mechanism(V).

Optional 3-position adjustable seat mechanism(U).

Your Healthcare Facility Will Never Be The Same!
